# PARQUET MAGAZINE

2009.

[www.tarkett-easterneurope.com](http://www.tarkett-easterneurope.com)

## Table of contents

Features and benefits that make Tarkett your best choice in wood flooring.

## Quality and beauty in harmony with nature

### Tradition and Innovation

Since 1886 Tarkett has been revealing the natural beauty of real wood and skillfully crafted it into floors revered for their timeless beauty and outstanding quality. Combining over a century of experience with the most technologically advanced manufacturing innovations, Tarkett has made luxury your reality. This has made us what we are today and what we are determined to remain: An internationally successful company with a rich tradition and a bright future.

### Quality inspired by nature

Just like nature is beautiful in its diversity, every tree is unique and offers a great variety of different structures and colors. This palette depends on how we cut the material. Over 120 years of experience in manufacturing wood has made our system for inspecting and grading the sawn wood constantly improve, allowing us to turn the genuine structure and appearance of wood into floors for your different expressions and styles.

On the following pages you will find out what practical information to consider when choosing a floor that will perfectly suit what you imagine for your home.

### A statement in style

Your personal style and attitude matters the most when it comes to decorating your private space. The desire to express your own lifestyle opinion and choice, yet state the distinctive and gentle style preference in every meaningful detail, sets the ground criteria for choosing the right value for your home.

Tarkett offers a wide selection of the world's most beautiful wood species to match your needs and become part of your everyday reality. Impressive range of your favorite oaks, European quality beech, walnut, ash, birch, cherry but also world exotics such as unique msasa, magical jatoba and superior african mahogany - all of these are carefully designed and crafted into two Tarkett collections of wood floors to dance on, depending what you prefer.

Our three-strip classic Salsa reflects the true warmth of family comfort in 30 different colors and moods. Unique planks from Tango range will nurture the affection for precious details, discovering a whole new meaning of style in captivating and inspiring manner.

### Green flooring solutions

By choosing one of the Tarkett wood floors, you will make a sustainable choice, a wise investment in your family's comfort, your home's value and the future of our planet. In processing wood for our Tango collection we are optimizing raw materials, using water-based and non-toxic finish.

Every advance we make in search for new solutions minimizes the impact on our surroundings.

Tarkett quality products stand for balanced choice and a better quality of life.

## From Nature to Your Home

Additional information about the products, special features and benefits of Tarkett wood flooring is available at [www.tarkett-easterneurope.com](http://www.tarkett-easterneurope.com)

Every tree gives a variety of different colors and structures which vary depending on how we cut the material. Our 120 years old experience in processing wood developed a unique system for carefully inspecting and grading wood, manufacturing floors with different looks, expressions and styles. We make the finest choice...

### Tango - one-strip wood flooring collection

The surface of the 1-strip parquet board is seen in one piece which shows the full character of the chosen wood species. This is a unique flooring with all the variety in grain - every board of 1-strip floor is special.

Available in 15 designs of TANGO collection:  
board dimension 2225 x 264 x 14 mm

Available wood species: Oak, Ash, Hickory, African Mahogany, Jatoba

Distinctive and strikingly elegant, premium traditional and exotic wood species from Tarkett Tango collection bring a world of distinctive beauty and charm to your home giving it a splash of warmth and deliciously authentic look.

### Salsa - three-strip wood flooring collection

Our collection Salsa offers you a great choice up to 30 different designs in 3-strip parquet boards, assuring that each board is made of three rows of strips. These floors have a lot of natural variation and a lively appearance. You can choose between traditional and exotic species, naturally treated and colored floors for an even more distinctive look of your home.

Available in 29 designs of SALSA collection:  
board dimension 2272 x 192 x 14 mm

Available wood species: Oak, Ash, Hickory, African Mahogany, Jatoba, Mouse, Birch, Beech, Alamo, Wenge, Kauri, Cherry, Douglas, Walnut

Attractive 3-strip parquet boards, made of three rows of strips, offer a wide range of decorating opportunities. This flooring gives a lot of natural variation and a lively appearance. From Tarkett Salsa collection, you can choose between traditional and exotic species, naturally treated and colored wood flooring for an even more distinctive look of your home.

All Tarkett wood floors have a 30 years warranty.

HARPER

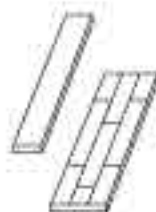

## Selecting wood floor - made even easier

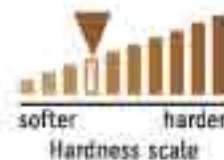

### Color

Many available colors are the result of the natural color and graining of the wood species and the stain applied to the wood. Your home's lighting will also play a role, so ask the retailer for samples and compare the wood color with the overall decor of your home.

### Width

Hardwood flooring is commonly described by board width: as strips (Salsa - 3-strip), and planks (Tango). The width of individual boards will have a dramatic influence on the final look of the floor. Select the look you like best - Salsa 2272 x 192 x 14 mm; Tango 2235 x 164 x 14 mm.

### Species

The species of wood influences its appearance, durability and hardness. Traditional Oak species are famous for their hardness and durability, variations in grain and shade that add character. There are many exotic species available - Kempas, Jatoba, African Mahogany - that take their distinctiveness from a combination of origin, color and surface characteristics. The hardness of wood is measured by the Brinell test - an industry standard test that reflects the tolerance of surface to pressure. The higher the score on the scale, the harder the floor.

### Edge Detail

The way the edges and ends of boards are cut is called edge detail or bevel. If you are looking for a high-contrast dramatic effect, you can choose between mini or maxi bevels in Tango collection. Square edges (Salsa - square edges) achieve a low-contrast effect by creating a more calm appearance.

### Gloss

Your choice of high gloss or low gloss is a matter of personal preference. Whether you opt for matt or shiny surface, you can be sure to have bought the most wear resistant finish on the market.

### Style and Texture

Whether your taste is rustic, traditional or contemporary, we offer a wide variety of styles and surface textures to meet your needs. Before making your final selection, explore - from smooth and plain, to rustic and bushed surfaces.

## Sustainable and strong multilayer parquet construction

**Locking system - T-lock**  
„click and lock“ system, where the boards snap together and create a perfect finish

**5 layers of Proteco lacquer**  
(shiny or matt)

**Layer of genuine wood** - this hardwood top layer is available in many different wood species and patterns

**Ribbing** - supporting, middle layer of soft wood guarantees strength and dimensional stability

**Veneer** - backing layer that adds even more to the stability of the parquet board.

# Our Wood

Oak	Ash	Merbau	African Mahogany	Jatoba	Msasa	Birch
						
<p><b>(Quercus sp.)</b> It's perhaps the most popular wood for floors and furniture. Beautiful, dignified and hard, Oak has the ideal qualities for a flooring material. Oak offers a variety of temperaments depending of which part of the tree is used and how the floor is made. The options range from rustic, dignified planks in a single width, to 3-way combinations with an attractive variety of lighter and darker tones.</p>	<p><b>(Fraxinus excelsior)</b> Is one of the noble wood-kind trees, and widespread during the whole period 8,000 years ago. Its wood is tough, hard and durable – ideal as a flooring material. Ash floors have a light, warm color with a lively honey grain, creating a vibrant mood with a friendly atmosphere. Ash also responds exceptionally well to heat treatment, achieving a rich, dark shade with a lively grain. You can also choose between different species, and between a finished or oiled surface finish.</p>	<p><b>(Intsia Spegali)</b> Merbau has tropical, refined look with a combination of its consistency in every elegant gradient. Merbau can be found in Asia (Indonesia, Filipina) which explains its dark and exotic appearance, with natural variations in warm red. Merbau grows in brightness and persistence to support with its elegant and luxurious pattern. Merbau grows in tropical conditions and naturally it contains yellow and white strains. It's extremely tough and suitable wood species.</p>	<p><b>(Tapeia)</b> Has a flexible, rich and rough grain with reddish brown stain that darkens over time and possesses beautiful wood in tiles when polished. Growing in relatively free of weeds and poisons. Its wood is not sticky, light, strong, stable from heat of the heat zone, being naturally uniform pale pink to red lower color, but which fades to a rich reddish-brown upon exposure. Mahogany's nature is variable, but typically used in combination with an excellent finish.</p>	<p><b>(Hybanthus couratili)</b> Jatoba can be found in the south of Mexico throughout Central America, and as far north as northern Brazil, Bolivia, and Peru. It grows best on the crests and sides of mountains or on bright hillbanks. Jatoba can attain a height of 40 m and a diameter of 2 m. The sapwood of jatoba is often broad and may be white, grey, or pink. The heartwood ranges from yellow to orange-brown when freshly cut.</p>	<p><b>(Bractypogon)</b> The species of wood that is called in Swahili is known as Msasa in the East African language, Shona. This type of wood is hard and weathered oak, which makes it ideal for flooring. Its color ranges from light brown to honey and it has a beautiful grain. The result is beautiful floor which provides an appealing and exciting contrast to the current trend towards light and airy interiors. You can have a beautiful floor with a clear coat or a lacquer finish, exclusively from Tarkett.</p>	<p><b>(Betula pendula)</b> Is an extremely popular tree that has a wide range of attractive and excellent properties. Birch gives you a pale, lively floor surface with a lively summer feel. Due to the grain, its pale wood changes into a warm golden shade that brightens up the interior. Birch is very hard and has a beautiful grain. The result is beautiful floor which provides an appealing and exciting contrast to the current trend towards light and airy interiors. You can have a beautiful floor with a clear coat or a lacquer finish, exclusively from Tarkett.</p>

# Species Our Wood Species

Beech	Acacia	Wenge	Kempas	Cherry	Doussie	Walnut
						
<p><b>(Fagus sylvatica)</b> Can be 40 to 45 m tall, and is the tree that thrives best in the shade. Anyone who's ever climbed in a Beech forest knows what a wonderful experience this is. Not only the feeling is captured in a Beech floor. Beech wood's attractive grain and pleasant color give the floor elegance and class. What's more, Beech wood is hard and durable, and ages gracefully.</p>	<p><b>(Wicketia Fendleriana)</b> A durable hard wood from fast growing trees from the East and South Africa. The straight, fine flame design and varied color shades give furniture and flooring made from it a warm appearance. Acacia can attain a height of 25 m. The flower and leaf can be used even in medicine, while its bark is extremely poisonous. With its green-brown and brown color it looks elegant and gentle especially when it is used for making high-quality wood floors.</p>	<p><b>(Mitella laurentii)</b> Wenge wood comes from a family of trees that first their home in West Africa. A popular flooring wood, wenge is a great option for interior and exterior flooring made from it is a warm appearance. Acacia can attain a height of 25 m. The flower and leaf can be used even in medicine, while its bark is extremely poisonous. With its green-brown and brown color it looks elegant and gentle especially when it is used for making high-quality wood floors.</p>	<p><b>(Nesquelea volkensiana)</b> The sapwood is yellowish-pale white. This species has an interlocked, sometimes wavy grain, is fairly softwood with coarse texture. Kempas has a natural resistance to decay. The wood remains smooth under friction and is reported to have no detectable odor. It is very hard and durable wood. Usage of Kempas tree is very wide – from parquet to furniture (especially chairs) to heavy wagon and trailer.</p>	<p><b>(Prunus)</b> Makes a beautiful, striking floor with its deep red color and attractive grain. It gives you a vibrant floor that stands out significantly from light shades down to dark reddish brown about six months after the floor has been laid. It creates a warm open atmosphere – because of its elegant color and lively grain it is always one of the most beautiful flooring solutions.</p>	<p><b>(Albizia africana)</b> The sapwood is pale yellow to white, while the heartwood ranges from light brown to reddish-brown. The grain is straight and slightly wavy. Doussie is very hard and durable. This species is suitable well, and is reported to have no detectable odor. It is very hard and durable wood. Usage of Doussie tree is very wide – from parquet to furniture (especially chairs) to heavy wagon and trailer.</p>	<p><b>(Juglans regia)</b> Walnut is extremely suitable for flooring. This wood species is known since antique times and its origin are in North America (USA, Canada) and Europe (Balkans). Excellent furniture, made of this wood is in various conditions even when made from this unique species. Walnut, with its dark color and beautiful grain pattern, can be used in different types, but every type is resistant of typical wear and tear.</p>

### Галина Аниа

архитектор компании Европум Проект, Член Союза Дизайнеров Украины

При разработке кабинета руководителя, необходим был натуральный напольный материал, который гармонизировал бы как с дизайном интерьера помещения так и с мебелью, выполненной в современном стиле. Мы выбрали 3-х полосную паркетную доску Tarkett - Мербау. Это покрытие идеально подходит с эстетической точки зрения а также соответствует украинским и международным стандартам экологичности и качества.

### Nemanja Djerman

Architect VISAMS, Novi Sad, Serbia

„Interior design is a specific and demanding discipline that imposes a certain life-style to the consumers by having its own space organizing philosophy and aesthetic criteria. It changes life-style habits. Floor coverings are crucial for creating new ambiances, both residential and commercial. In the aspect of contemporary design floor stands for a perfect blend of aesthetics, quality and functionality – just what Tarkett wood floor assortment has. Products perfectly fit into any existing interior and serve as a great guideline for designing a completely new one. Why Tarkett? First of all, it offers an excellent choice of colors, types and dimensions, which provides maximal security when designing a room. Second, it offers competitive prices. Third, Tarkett provides complete technical information which is essential for the longlasting performance insight. And in the end, Tarkett wood floors are very attractive and comfortable, ambiental in a word.“

### Валерия Исаква

дизайнер интерьеров, участник проекта «Квартирный вопрос»

«Каждый интерьерный проект индивидуален и уникален, как и его заказчик. Задача дизайнера не просто в выполнении технического задания клиента, но, в конечном счете, в том, чтобы сочетанием цвета, света и текстур создать интерьер, который будет отражением личности заказчика, в котором хозяин будет чувствовать себя максимально комфортно. Паркет Tarkett имеет широкий спектр фактур, оттенков и структур. Это позволяет находить и традиционные, и нестандартные решения для самых различных по стилю и характеру проектов. Прекрасное сочетание эстетических и эксплуатационных качеств – обоснование моего выбора паркета Tarkett»

<b>Oak Black</b> WTNGA-0008XONT1422								
<b>Oak Country</b> WTNGA-0008XPT1022								

	Color variation over time Wood is a natural material that reacts to light over time, gaining richness in color.		Color Variation Scale The normal color variation found in natural wood differ from species to species. „Best“ indicates the greatest board-to-board color variations.		Hardness Oak is used as the industry-benchmark. The scale compares the species' hardness according to Brinell hardness test.		All Tarkett products have T-lock locking system
	Stainings Illustrates stained products.		Brushing Illustrates brushed wood floor surfaces.		Bevel Illustrates board edge style.		Protoco/protoco reduce language Matt or shiny lacquer.
