

Collection of special finishes and treatments available on solid wood, two layers and three layers with oil finish oak woodfloors.

The distressed fibres imply an evident brushing of the planks.

This means reveals big knots, even puttied, traces of sapwood, flamed texture and flakes, other irregularities of the woods and even small scratches or dents occurred during the production process.

Siena

Warm colors of clay and natural curves of the earth are embodied in the wood to make people feel unique emotions. Siena is an extraordinary and intact town subsisting its medieval structure in a perfect harmony with the land around it. Its streets and lanes evoke centuries of art and history.

Arles

Provence's relaxed rhythms and the quality of the light in Camargue, purple of the lavender and the blue of the sky. All this is Arles, a walk through the past among the sand of arenas and the pastel colors of the houses.

Anversa

Chromatic contrasts convey the energy and sprightliness of markets and channels, the luxury of the most precious jewels and the strong feelings immortalized in Flemish paintings. Freedom and richness embodied in the planks of Antwerp, the city of diamonds.

Oxford

The peace and the respect, the glamour and the sense of safety granted by a site rich in age-old culture, this is Oxford, the city with its harmonic gothic architecture of the building in one of the most famous universities in the world. The colors of an ancient wood which inspire in each environment a timeless atmosphere.

STIL[Art]

European feeling evokes emotions and warmth in the new line of finishes.

Arles, Anversa, Dublino, Praga, Oxford, Siena, Oslo and Granada represent a virtual tour to take in the atmosphere and experience of the old world. A world rich in history and tradition inhabited by men with the ability to build a new world.

The value of tradition remains a solid base and is fundamental for the development of the future.

More than ever we have the need and aspiration to rediscover the identity and our feeling as a part of a reassuring world culture. These are the conditions for optimism and enthusiasm to continually reinvent ourselves...

STILArt can be a good start!

Oslo

It calls forth elegance and peacefulness. The white brings the feelings brought by the first snow and the ice covering everything leaving people as if they are frozen in time, it evokes the cold but it suggests the warmth.

Granada

Wood's grain like the arabesque and the strength of the color create Granada, the charm and the grace of the More's culture join the warmth of Andalusian traditions to suggest a fantastic atmosphere.

Dublino

The whisky flavour, the typical Irish days' colours, the dark and intense shade of the beer. Dublin is a genuine and intense city, just like the island it is the capital city of. The new dark grey colour represents all this with elegance and rigour.

Praga

The timeless elegance and the charm of one of the symbol cities of the cultural renaissance merge and create a new color taken from the warm shades of grey, it conveys the contrast between the noble Oak wood and the contemporary living.
